CHAPTER I: THE TAIWAN STRAITS HEAT UP

Prior to July 1958 the Taiwan Straits had gone through a period of relative quiet since the last Chinese Communist probe against the Offshore Islands in 1954-55.* Periodic artillery fire had been exchanged between the two sides but at very low levels and most of it consisted of shells packed with propaganda rather than high explosives. In addition, the two sides exchanged loud speaker broadcasts across the narrow straits between Quemoy and the mainland, a scant six miles. In July 1958 signs were detected of increased Chinese Communist activity in Fukien Province opposite Taiwan. Awareness of these actions by the Government of the Republic of China (GRC) led to increased activity by the Nationalists. The U. S. Government in turn took steps to meet the increased Chinese Communist activity. By early August some United States and GRC officials concluded that a new crisis was about to break in the Taiwan Straits.

THE MILITARY BALANCE

Assessments of the military balance in the Taiwan Straits and the Far East and of the strategic balance between the United States and the Soviet Union made by American officials both before and after the crisis suggested that the Chinese Communists had superiority in a clash limited to Chinese Nationalist and Chinese Communist forces only and aimed at an interdiction of or assault against Quemoy or Matsu. United States intervention would certainly assure the defense of Taiwan and would enable the holding of Quemoy against a blockade attempt and against an invasion but, in the view of most American officials, only with the use of nuclear weapons. During the crisis there were qualitative and quantitative improvements in both GRC and American forces in the Taiwan Straits area but these augmentations did not change the basic assessment of relative strength.

Chinese Communist Forces

In August 1958 the Chinese Communists were estimated to have approximately 894,000 men under arms organized into twelve armies. Three of these armies of 46,000 men each were in Fukien Province opposite Taiwan, and 80,000 troops, including one artillery division and two anti-aircraft artillery divisions, were believed to be within fifty miles of the mainland coast three miles across the Straits from Quemoy.[1]

A special national intelligence estimate (SNIE) in August 1958 estimated that Chinese Communist troop movements could take place rapidly and probably without detection. It was estimated that the Chinese Communists would be able to obtain a three to one superiority for an amphibious assault and could be expected to mass approximately 200,000 troops before attempting an attack on Quemoy. Such forces were estimated to be capable of successful assault operation provided the Chinese Communists also had air and naval superiority. It was estimated that by using all of their small landing craft capability, the Chinese Communists could lift three rifle divisions for assault on Taiwan. The Chinese Communist Air Force was estimated to have a good air defense and tactical support capability and a good early-warning system and could prevail over the Chinese Nationalist Air Force in any attempt to capture Taiwan.[2] The estimated size of Chinese Communist air and naval forces as of August 1958 is indicated in Table 1.

For possible use in a blockade effort as well as support of an invasion, the Chinese Communists had approximately 393 artillery pieces in the Quemoy area, including thirty-six 150-mm howitzers. The guns were in place around Amoy Harbor on the mainland, on Amoy, and on two small Chinese Communist controlled islands in an arc of 240 degrees from Quemoy. Most of the gun positions were not covered in any way but there was ample room to move and replace the batteries and each could be fired from several alternative positions. The artillery was reported to be able to hit all of the Quemoy Islands except for a small part of Big Quemoy. Though the Chinese Communists had begun to manufacture many kinds of artillery, it was estimated that production was still relatively low and that therefore most of the pieces in the Quemoy area had been made in the Soviet Union. The ammunition itself was manufactured by the Chinese Communists.[3] The Chinese Navy was believed to have extensive offensive and defensive mining capability, and the SNIE estimated that with some strengthening of the deployment of units currently assigned to the fleet, the Chinese Communists could effectively interdict supply landings to the Offshore Islands.[4]

Chinese Nationalist Forces

The Chinese Nationalist Army in August 1958 consisted of approximately 450,000 men of whom 320,000 were of combat capability. Approximately one-third of these troops were

Later issued as part of Annex A to SNIE 100-9-58.

on the Offshore Islands, with 86,000 troops on Quemoy and 23,000 in the Matsu group. The break down of forces on the Quemoy Islands is indicated in Table 2. The troops on the Offshore Islands were believed to be equipped with approximately thirty days of supplies and forty days of ammunition. The Chinese Nationalists had 308 artillery pieces in place on Quemoy, though only 56 of these were considered capable of effective counter battery fire.[5]

The Chinese Nationalist Navy was estimated to be primarily defensive but capable of lifting one division to the Offshore Islands in order to bolster their defense. It was believed unable to oppose successfully the Chinese Communist PT boat and submarine force, which could operate in the Taiwan Straits area. There was reported to be virtually a complete lack of coordination between the Navy and the Chinese Nationalist Air Force which, as indicated, was believed to be significantly inferior to the Chinese Communist Air Forces. The air force was reported to have a photo-reconnaissance capability within 750 miles of Taiwan and a limited night reconnaissance capability of up to 1000 miles. Reconnaissance missions were regularly flown over the mainland. Virtually all of the Chinese Nationalist military equipment was of American origin and had been

supplied under the American Military Assistance Program. The strength of the Chinese Nationalist Navy and Air Force is indicated in Table 3.

Although the Chinese Communists were later to claim that the cause of the crisis was the build-up of Chinese Nationalist troops on Quemoy, there is nothing to suggest that this was in fact a very likely or very important part of the Chinese Communist motivation. Although a significant movement of troops prior to the crisis did take place between July 2 and July 13, 1958, when the 58th Chinese Nationalist Division replaced the 32nd Division on Quemoy,[6] the only major increase in forces on Quemoy had occurred in October 1956 when the garrison was increased from 79,000 to 85,000 men. Very little military activity of consequence appears to have been carried out from the Offshore Islands. There had been a few attempts at penetration from the Islands but none had been successful. No overflights were staged from the Islands and the blockade of Amoy Harbor had been lifted by the Chinese Nationalists in July of 1957. Artillery fire from the Island was at a very low level and consisted mainly of propaganda shells augmented by the use of loudspeakers.[7] The range of activity is indicated in Table 4, and the pattern of artillery fire in

Table 4

CHINESE NATIONALIST ACTIVITY FROM THE OFFSHORE ISLANDS

Prior to August 1958

Activity	Comments
Commando-type raids	During the preceding year the GRC probed the nearby mainland from both Quemoy and Matsu with small scout raiding operations of extremely shallow penetration. The largest raid, which took place on October 2, 1957, involved a party of 28 men which withdrew almost immediately after drawing machine-gun fire. The GRC forces demonstrated an ability to land larger numbers of men on the mainland by holding training exercises under Chinese Communist observation and using clearly interceptable communications.
Infiltration	The Islands of Matsu were used extensively by several GRC intelligence groups to infiltrate agents to the mainland. In July 1958, for example, the Ministry of National Defense (MND) put 150 agents in from Matsu. Quemoy was used much less extensively for this purpose. Generally, the infiltration was not successful, the agents either immediately surrendering or being captured.
Overflights	No overflights were ever staged from the Offshore Islands. The small planes which landed at the single Quemoy airfield did sometimes fly in close for observation but never penetrated over

Table 4 -- continued

	the mainland. There is no airfield on the Matsu Islands.
Loud speaker propaganda	The GRC operated four loudspeaker stations on Quemoy and one on Matsu. Wind prevented their use one-half of the year and limited their effectiveness for the rest of the year. Average broadcasts of three or four hours were carried one or two days every week and consisted half of music and half of propaganda. The propaganda was aimed at countering the Chinese Communist propaganda directed at the Offshore Islands. It often appeared to be operating simply to keep the troops on Quemoy from hearing the Chinese Communist propaganda.
Port blockade	GRC artillery on Quemoy could interfere with foreign shipping entering the Amoy harbor but had not done so since July 1957. Any Chinese Communist merchant ships passing within range were fired upon. The guns on Matsu did not command the entrance to any important port.
Artillery fire	There was relatively less fire by the GRC in the year preceding August 1958 than in previous periods. The GRC did not fire at all from the Offshore Islands in August. During 1958, prior to the crisis, the GRC had fired 3,174 rounds from Quemoy. Two thousand of these were fired at the Ta-teng causeway and the rest were fired against the

Table 4 -- continued

	mainland. Two-thirds of the shells were propaganda rather than explosives (HE). (Table 5 shows the pattern of fire during the first six months of 1956-58.)
Mining operations	There was no mining around Quemoy or Matsu. The GRC had plans to lay defensive mines to the west and north of Quemoy, but this would have required United States concurrence because the Navy Military Advisory Assistance Group (MAAG) held the necessary explosive mechanisms.

American Pacific Military Forces

As indicated above, in a Chinese Communist-Chinese Nationalist clash, the Chinese Communists were considered to have the capability both of establishing air and naval superiority in the Taiwan Straits and of capturing the Offshore Islands, provided they were willing to accept the large casualties that would be involved. The unknown, as far as the Chinese Communists and the Chinese Nationalists as well as the American military forces in the area were concerned, was what role American military forces would in fact be prepared to play. It was clear that if the total American military power in the area, including its atomic capability, were thrown into the balance, Quemoy could be held, but the consensus appeared to be that the United States simply did not have the conventional capability to hold Quemoy against a determined Chinese Communist attack.

On August 23 there were 144 atomic capable aircraft and missiles in positions which could support Taiwan. Sixteen of these were Naval aircraft aboard the U.S.S. Hancock. The Air Force capability was as follows: F100's, 87; B57's, 16; PM61's, 20; B47's, 5; for a total of 128. The Johnson Island B57 Squadron was on alert.[8]

United States conventional capability in the areas was as follows: The Pacific Air Force had the following units capable of non nuclear operations: 1 F-100 Squadron at Clark Air Force Base, 2 F-100 Squadrons at Kadena, 1 F-100 Squadron at Chia-ti and 1 B57 Squadron at Naha. These units were reported to have POL, spare parts and high explosive (HE) weapons which could be employed while still maintaining a substantial part of their general war capability. In addition, the Pacific Fleet was reported to have four aircraft carriers with sufficient ammunition for 80,000 rounds per day for sixty days. The Chinese Nationalists operating in conjunction with American forces were reported to be capable of 650 sorties per day, delivering 1,300 bombs for only fifteen days.[9]

At the time of the outbreak of the crisis, the Taiwan Defense Command (TDC) had authorization from the Commander in Chief, Pacific (CINCPAC) to plan with the GRC to defend Taiwan and the Penghus, including planning for United States participation in the defense of Quemoy and Matsu if and when this might be ordered by higher U. S. authority.

The Strategic Balance

In the summer of 1958 American strategic nuclear superiority over the Soviet Union was very great, possibly as great as it would ever be in the postwar period. This superiority was apparently recognized by top American

that it was not just the Offshore Islands that were at stake but the whole position of the United States in the Far East. Chief of Staff of the Army General Maxwell Taylor was the only Defense Department official present who voiced any doubts as to whether the United States really wanted to stake so much on the defense of these Islands. The head of the Policy Planning Staff, Gerard Smith, and Robert Murphy, Deputy Under Secretary of State for Political Affairs, both expressed some skepticism about a strong policy, and Murphy raised the question of whether there was any possibility of getting the GRC to evacuate the Offshore Islands. However, the general consensus of the meeting, particularly as it reflected the view of Assistant Secretary Robertson, was that it would be impossible to get the GRC to evacuate the Offshore Islands. The former Taiwan MAAG head, General Leander Doan, who was present at the meeting, reported that GRC plans were for holding the Offshore Islands at all costs. He stated that the GRC would try to reinforce the Islands if necessary and would use their Air Force and Navy "in a fight to the finish" over the Offshore Islands.

Apparently largely under the influence of the contingency planning for the possibility of an attack on the

Offshore Islands, in which many of those at the meeting had been engaged, a general unstated assumption at the meeting was that an interdiction attempt against the Offshore Islands would be by air and sea since it was believed that artillery interdiction could not be successful. Twining expressed the view that the GRC must try to cope alone initially with any air and sea interdiction campaign. Any blockade would take a long time to become a complete success, he said, and before it did become completely successful the United States would intervene. Under questioning by Herter, Twining made it clear that the United States would have to use nuclear weapons against Chinese air bases to prevent a successful air interdiction campaign by the Chinese Communists. He noted that the U. S. military would begin by attacking a few of the fields in the Amoy area, using low-yield ten to fifteen kiloton nuclear weapons. At this point the Chinese Communists hopefully would break off. But if they did not, the United States, Twining indicated, would have no alternative but to conduct nuclear strikes deep into China as far north as Shanghai. The Chairman of the Joint Chiefs suggested that this would almost certainly involve nuclear retaliation against Taiwan and possibly against Okinawa, but he stressed that if national policy is to defend the

Offshore Islands then the consequences had to be accepted.* In response to a question by Smith, Twining expressed the view that the Chinese Communist Air Force could not be successfully opposed by simply engaging it in the air over the Offshore Islands. The United States, if it was not to lose such a battle, would need to hit bases.

Taylor urged the Department of State to clarify what the United States wanted to hold and stressed that the minimum force necessary to hold these areas should be used.

Herter and Twining expressed concern, as Washington officials were to do throughout the crisis, over the possibility that the GRC might engage in some action against the mainland which would lead to a United States-Communist Chinese war. But Herter was assured by Robertson that the GRC was pledged to consult the United States before bombing the mainland and would honor the agreement.

Twining urged that the decision be taken now as to whether or not the United States would defend against interdiction as well as against a direct attack on the Islands. It was assumed by those at the meeting that the United States would oppose a direct attack against the Islands, but nobody present knew whether the United States would defend against an interdiction attempt, nor was there anybody present who had the authority to make the decision.

---

*There was no discussion of whether the Chinese were expected to get nuclear weapons from Russia or whether the Russians would attack Taiwan. The possibility that there would be no nuclear retaliation to an American nuclear attack on mainland China does not seem to have been viewed as a serious possibility. In part at least this reflected normal planning caution; however, it was also a reflection of the then current [illegible] of close Sino-Soviet cooperation.

The meeting concluded with a discussion of a point raised by Robertson as to whether or not the United States should make a public statement which might have the effect of deterring the Chinese Communists from attacking or interdicting the Offshore Islands. This was rejected in favor of a private approach through diplomatic channels, either by John Foster Dulles approaching Soviet Foreign Minister Andrei Gromyko directly or by a message sent via the British Ambassador in Peking. Robertson suggested that if asked at a press conference as to what the U. S. position was, the President or the Secretary of State should follow the proposal of the Chinese Nationalist Foreign Minister and simply say that a Communist attack would be disturbing to the peace of Asia. Twining indicated that he would prefer simply a reference to the Congressional Formosa Resolution.

The meeting ended with the group agreeing that a decision needed to be taken at the Dulles-Eisenhower level.

as to what the U.S. reaction would be to an air-sea interdiction campaign against the Offshore Islands. It was also agreed that the Chinese Communists should be warned through diplomatic channels that the United States would not tolerate capture of the Offshore Islands.[101]*

Following the meeting at the Pentagon, Herter drafted a memorandum to Secretary of State Dulles in which he summarized the discussion and reported its conclusions. He noted that State and the Joint Chiefs were agreed that the loss of the Offshore Islands would lead to an attack on Taiwan. Herter reported that the meeting confirmed his own view that there was a need to warn the Chinese Communists that if they attempted to seize Quemoy and Matsu by assault or interdiction, they would run the clear risk of U.S. military countermeasures to keep the Islands in GRC hands. While this seemed to Herter to be the most effective way to preserve the Islands as well as the peace, he noted that it also involved serious risks.

---

*The Joint Chiefs of Staff, at a meeting held on the 15th, apparently after the meeting with Herter, decided in principle to build up and maintain the GRC Air Force in a position of qualitative superiority to the Chinese Communists.[102] They recommended that six F-100Bs which had been earmarked for NATO be diverted to Taiwan. This request was approved by Secretary of Defense Neil McElroy on the 21st.[103]

Herter recommended to Dulles that a warning be sent to the Chinese Communists through diplomatic channels. However, he cautioned that if the United States made such a warning, it must be prepared to defend the Islands. Herter suggested that Dulles confer with Eisenhower with a view towards agreeing to convey informally to Gromyko the information that the United States would prevent seizure or successful interdiction of the Offshore Islands. He also stressed the importance of considering the Congressional implications of U.S. action. If the issue came up at a Dulles press conference, Herter recommended that Eisenhower fall back on the Congressional Formosa Resolution.[104]

The Herter memorandum was reinforced early the following week by a memorandum from Assistant Secretary of State Robertson to Dulles. In the memorandum Robertson stressed that it was time to make a decision on whether to defend the Offshore Islands. He again summarized the meeting with the Joint Chiefs of Staff and stressed that the Joint Chiefs felt that it was highly advisable to warn Peking that any attempt to seize Quemoy and Matsu by assault or interdiction ran the clear risk of U.S. military moves to hold the Island. However, as Herter had done, Robertson noted that if the United States did warn Peking, it must be prepared to make good and hence a decision was needed as soon as possible. If a decision should be made not to defend the Offshore Islands under any circumstances, then, Robertson recommended the United States should make an intense effort to force a withdrawal before a blockade by the Chinese Communists began, since a blockade (again under the assumption of air and sea action) would be successful. Under these circumstances the United States should not make any military moves or give any private warnings of intentions.

However, Robertson strongly stated that the United States must decide to defend the Offshore Islands under all circumstances if Taiwan was to be held. The decision ? to defend should be a closely held secret, but the United States should, Robertson urged, make a series of moves to deter the Chinese Communists.

The memo concluded that the United States should defend the Offshore Islands for the following reasons, even if the use of nuclear weapons were required:

1. The United States could not force a withdrawal by the Chinese Nationalists at this time.
2. An attempt to force a withdrawal would shatter GRC confidence or lead to an attack on the mainland.

3. There would be concern in Korea, Vietnam, and elsewhere if the United States tried to force a withdrawal.
4. A withdrawal would not liquidate the crisis since the Chinese Communists were really after Taiwan.
5. The Soviets wanted to avoid nuclear war and would restrain the Chinese Communists. The Chinese Communists would also restrain themselves if they believed the United States would defend the Offshore Islands.
6. The United States had some conventional capability and therefore blockade-running and HE bombing should be tried before nuclear weapons were used.

The memorandum concluded with the following four recommendations:

1. A decision to defend under any circumstances should be reached by the Secretary of State and the President.
2. Peking should be warned through diplomatic channels, perhaps through the Soviet Union, that the United States would defend the Offshore Islands.

3. Eisenhower should say in any case that a Chinese Communist attack on the Offshore Islands would be disturbing to the peace in Asia.*
4. There should be an increased military build-up both of U. S. and GRC forces.[105]

Based on the NSC discussion and the meeting afterwards, LeMay responded to Kuter's request for guidance. He informed the Pacific Air Force Commander that should the contingency arise of a wholly unexpected Chinese Communist attack on the Offshore Islands, the United States must be prepared for immediate retaliation. The best means of neutralizing the Chinese Communist Air Force quickly, LeMay noted, would be simultaneous strikes against the coastal airfields using Guam-based SAC B-47's in order to catch the bulk of the Chinese Communist aircraft on the ground. Kuter was advised that SAC had been alerted for this purpose and that if Chinese Communist Beagles were moved south, it might be necessary to augment the Guam capability. Kuter was instructed, in what was the first of a series of modifications of the OPS PLAN which were to become necessary as American strategy to deal with the crisis unfolded, to modify OPS PLAN 25-58 to include this concept. Kuter's advice on these directives was requested before final JCS decision.106 On the following day Kuter responded by concurring in the proposal that the GRC be permitted to bomb airfields if the Chinese Communists used air attacks against the Offshore Islands. He noted that a second step still short of Phase II of 25-58 might be desirable. "There would be merit in a proposal from the military to limit the war geographically [to the newly operational Chinese Communist air bases] if that proposal would forestall some misguided humanitarian's intention to limit a war to obsolete iron bombs and hot lead."107 This was to be the first of a series of actions by Kuter designed to make it clear that he felt the United States should not fight with just HE weapons should it be forced into a war in the Taiwan Straits.

---

*Herter, who feared that the GRC might try to drag the United States into a war with Communist China, had in his memorandum adopted Twining's suggestion that Eisenhower should simply refer to the Congressional Formosa Resolution. Robertson, as he was to do throughout the crisis, defended the GRC as a loyal ally and sought the adoption of the GRC proposal.

On August 18 the American Ambassador in Tokyo, Douglas MacArthur II, reported that there was real concern in certain quarters within the Japanese Government over the mounting tension in the Taiwan Straits. He noted that should the United States become involved in military hostilities involving only Quemoy and Matsu, the United States should be prepared for a Japanese request not to use U. S. bases in Japan for military operations.[108] However, after receiving this information the Air Staff was able to report that this would not affect current operations plans since, as has been previously noted, CINCPAC OPS PLAN 25-58 assumed the Japanese bases would not be available. It was indicated that other bases could handle this situation.[109] It should be noted, however, that the CINCPAC OPS PLAN assumed that the U. S. operation would be largely an atomic air attack directed against the Chinese airfields, and that the notion that the Japanese bases were not needed was simply the belief that the airfields could effectively be attacked without the use of the Japanese bases. It did not preclude the possibility that in a long drawn-out conventional operation, which might have ensued in the Taiwan Straits, Japanese bases would be needed.

On the same day, the Joint Staff completed a paper in response to the August 12 request from Gordon Gray for the Joint Chiefs to consider a number of possible alternatives in the Taiwan Straits and propose U. S. courses of action. The memorandum was tabled at the Joint Chiefs [illegible] of August 20 but no action was taken. The memorandum considered each of the situations posed by Gray and recommended U. S. courses of action as indicated in Table 10. The paper assumed that the United States should take whatever action was necessary to hold the Offshore Islands. It reached a more optimistic conclusion than Twining expressed at the State-JCS meeting during the previous week on what would be needed to cope with an air and sea interdiction effort. The Joint Staff paper suggested that U. S. air and sea cover would be sufficient to break the blockade. The study, however, confirmed Twining's belief that nuclear weapons would have to be used to defeat an invasion attempt. Gray also had asked what steps the United States should take publicly or otherwise to state its policy towards the Chinese Communist effort to take the Offshore Islands. The Joint Chiefs recommended that no steps be taken.[110]

On the 22nd, the Joint Chiefs noted a report completed by the Joint Staff on August 15 which was used in supplying the answers to Gray's questions. The study concluded that the Chinese Communists would use approximately 230,000 troops if they tried to assault Quemoy. These forces were reported to be available in the area, and it was believed that the 2,000 junks in the area augmented by rafts and

Table 10

JOINT STAFF RESPONSE TO GRAY QUESTIONS

Situation Listed in Gray Memorandum	Joint Staff Suggested "U. S. Proposed Course of Action"
Situation A: Chinese Communists without blockading become increasingly aggressive in the air over the Taiwan Straits, provoking incident.	1. Increase military aid to GRC (Sidewinders are on way and this should be announced). 2. U. S. should assume Taiwan air defense, which would mean more U. S. aircraft. 3. Increased show of U. S. force. 4. No GRC bombing of mainland. The Chinese Communists might in this situation be trying to provoke the GRC.
Situation B: Chinese Communist Air Force penetrates air space over Taiwan or Pescadores.	1. U. S. should resist by employing U. S. Air Force forces available on Taiwan and 7th Fleet air. U. S. planes should be used only if the GRC cannot handle the situation and against planes making an attack. 2. If there is a very large penetration, U. S. Air Force aircraft could attack mainland air bases, using conventional and nuclear weapons. However, an effective attack would require nuclear weapons. An attack against coastal airfields could be carried out without bringing on a full-scale U. S.-Chinese

Table 10 -- continued

Situation Listed in Gray Memorandum	Joint Staff Suggested "U. S. Proposed Course of Action"
	Communist war. However if the Chinese Communists did not cease, the U. S. would have to attack more airfields.
Situation C: Chinese Communist Blockade of the GRC-held Offshore Islands by sea and air with view to forcing surrender without landing troops.	1. U. S. to provide air cover and naval escort for re-supply. This would be effective in holding the islands and would be a natural extension of current U. S. policy. 2. Failure to take necessary naval and air action would result in the collapse of the GRC forces on the Offshore Islands. This would impair the faith of the GRC in the U. S. 3. The U. S. could not afford to let the Offshore Islands be lost by any means, including blockade.
Situation D: Chinese Communists launch a major assault on the Offshore Islands.	1. Action under C also applies. 2. U. S. should issue ultimatum of retaliation and bring issue to UN -- U. S. should seek UN endorsement but cannot wait for it. 3. The U. S. should use its full strength to defeat the attack, involving the use of nuclear weapons by the United States. The use of SAC would be required, as well as the reinforcement of local forces.

Table 10 -- continued

Situation Listed in Gray Memorandum	Joint Staff Suggested "U. S. Proposed Course of Action"
Situation E: Chinese Communist attack against Taiwan and the Pescadores.	Same as D, without ultimatum, and there would be a need for atomic attack against sea-based forces.

SOURCE: Chiefs of Staff Memorandum for General Twining, General White, General Taylor, General Pate, Admiral Burke, Subject: Consideration of courses of U. S. Action with respect to Taiwan (U), Signed Oliver S. Pitcher, General, USAF, Director Joint Staff, JSC DM 280-58, August 20, 1958 (Top Secret).

declass.

floats could lift the force. The study indicated that the Chinese Nationalist forces on Quemoy were not excessive for a maximum defense effort.[111]

On the same day, for the first time since August 8, Secretary of State John Foster Dulles (having just returned from a vacation)[112] attended a meeting to discuss the crisis. In attendance in addition to State Department officials were General Twining, Admiral Burke, and CIA Director and brother of the Secretary of State, Allen Dulles. The meeting began with a briefing by Allen Dulles on the military situation, which was later to be published as an Annex to SNIE 100-9-58. The CIA Director reported that there were over 100,000 troops on Quemoy and Matsu with thirty to forty days of supplies and that the Chinese Communists had not been trying as yet to intercept supplies.

John Foster Dulles expressed misgivings about the willingness and ability of the GRC to fight and hold the Offshore Islands. He stated that he did not want to help the GRC if they would not fight to the death. He was assured by Robertson that the GRC would fight and that they could hold an attack for at least a week. Dulles then stated that if the Nationalists would hold the Offshore

Islands for at least a week against an invasion, the United States would be drawn in. It was estimated at the meeting that Quemoy could hold out against a blockade for at least thirty days. The Secretary of State stressed that the United States should continue to look as if it would welcome a fight as this tactic was most likely to deter the Communists. He expressed the view that the Chinese Communists would not start anything except by miscalculation, that is, if they believed that the United States might not intervene. The possibility of sending a note to the Chinese Communists or to the Soviet Union was discussed. It was decided, however, that this would do little good and would be less effective than actions, and might be taken by the Chinese Communists as a desire to negotiate and therefore as a sign of weakness. It was agreed that the following actions should be taken in order to suggest to both the Communists and the Nationalists that the United States would intervene in the event of a major attack:

(a) To increase GRC and American military capabilities in the Taiwan Straits:

(1) One carrier should be added to the Seventh Fleet and three carriers should be kept in the Taiwan Straits.

(2) A Fleet exercise should be held, but not in the Straits.

(3) Admiral Smoot should make a trip to the Offshore Islands.

(4) The United States should increase its fighters on Taiwan.

(5) There should be an increase in the flow of supplies, and if possible, daylight supplies, to the Offshore Islands.

(6) There should be a loan of three U. S. LST's to the GRC and the shipping of Sidewinder missiles to the GRC.

(7) There should be an increase of shipment of weapons to the GRC, including recoilless rifles, and other infantry equipment for delivery to the Offshore Islands.

(8) There should be a U. S.-GRC joint air defense exercise.

(b) In response to a possible question at a press conference, Eisenhower should answer that it is doubtful that a Chinese Communist effort to capture the Offshore Islands could be a limited operation and that it would consistute a real threat to the peace. It was also noted that he might refer to the Dulles letter in the correspondence to be exchanged between Dulles and the Chairman of the House Foreign Affairs Committee, Thomas Morgan. This letter was released on August 23. (c) Drumright was authorized to clarify with the GRC its retaliatory rights in light of the 1955 Dulles-Yeh exchange, and to tell Chiang that a heavy attack on the Offshore Islands would constitute an emergency in terms of the agreement and would justify retaliation, but that a minor attack on the Offshore Islands would not. Drumright was also instructed to inform the GRC that further measures were under review to strengthen the GRC military.[113]

Following the meeting, the exchange of letters between Dulles and Representative Morgan was arranged. In response to Morgan's letter, which had noted with concern the reports of a Chinese Communist build-up of air power opposite Taiwan and asked for Dulles' comments, Dulles wrote in a letter released on August 23:

> We are, indeed, disturbed by the evidence of Chinese Communist build-up, to which you refer. It suggests that they might be tempted to try to seize forcibly the Quemoy or Matsu Islands.
>
> As you know, these islands have been continuously in the hands of the Republic

> of China, and over the last four years the ties between these islands and Formosa have become closer and their interdependence has increased.
>
> I think it would be highly hazardous for anyone to assume that if the Chinese Communists were to attempt to change this situation by force and now to attack and seek to conquer these islands, that could be a limited operation. It would, I fear, constitute a threat to the peace of the area. Therefore, I hope and believe that it will not happen.*[114] [Italics added.]

In the letter to Morgan, Dulles had come very far towards satisfying the GRC request that he make a public statement that the United States would defend the Offshore Islands. The letter was as clear as the later Dulles statement after his conversation with Eisenhower at Newport on September 4. It went as far as Dulles could go, given his interpretation of the Congressional Resolution, and was agreed upon as soon as Dulles returned to Washington. The apparent refusal of the United States to issue such a warning had been part of the message to the Chinese Communists which had led them to believe that the United States might not defend Quemoy. It is impossible to say whether or not had the letter been published one or two days earlier it would have prevented the Chinese Communist attack. As a matter of fact, the artillery attack had been launched before the letter reached the Chinese Communist leadership.

---

*The New York Times interpreted the Dulles letter as a warning to the Chinese Communists not to seize Quemoy or Matsu. The same story reported a build-up of ground forces opposite Taiwan but it was reported that this build-up was not believed sufficient for an amphibious invasion of the Offshore Islands but rather was part of the forces which had been removed from North Korea. Hong Kong observers were reported to believe that the Dulles warning would help satisfy Taipei by making a definite commitment to defend the Offshore Islands.[115]

After the meeting, which lasted most of the afternoon, Dulles conferred with Robertson and Herter. Dulles and Herter then went to the White House and spent a half hour discussing the situation with the President. At six that evening, Dulles and Herter returned to State to continue planning with Robertson and with Assistant Secretary for Congressional Relations William B. Macomber, Jr.[116]

On the 20th of August, the Navy, in a response to a memorandum from Marshall Green at State, reported that there appeared to be no pattern to the previous Chinese Communist shelling of the Offshore Islands. The Chinese Communists, according to the Navy, appeared to have the capability to crater the airfield on Quemoy and to destroy the port facilities, but they had not done so. There was no operations plan for the U. S. air defense of Taiwan, but such defense could be put into effect and, though it would help the GRC somewhat, it would not be decisive. In response to a question on the possibility of some kind of escort, the Navy noted that there was no such thing as a degree of escort and the United States would either have to escort completely or not at all. They provided an estimate to Green that the latest aircraft being supplied to the Chinese Nationalists were superior to the MIGs which the Chinese Communists had.[117]

THE EVE OF CRISIS

The Chinese Communists successfully occupied the airfields opposite Taiwan without the threatened bombing attempts by the Chinese Nationalists and succeeded in sharply reducing the ability of the Chinese Nationalists to engage in overflights over the Chinese mainland opposite Taiwan. They, then, were clearly ready to go a step further in their campaign of the use of military force to secure the political objective of overthrowing the Taiwan regime. Although they were no doubt aware of the build-up in American forces in the area and of aid to the Chinese Nationalists, the American build-up had not yet assumed major proportions, and its meaning within the context of a Chinese attempt to seize Quemoy remained ambiguous.

American and Chinese Nationalist caution in response to their activation of the airfields plus the refusal of the United States to state that it would defend Quemoy probably gave the Chinese Communists some confidence in the belief that the United States would not support a defense of Quemoy and perhaps might even force an evacuation of the Islands. The Chinese Communists were then ready for a move against the Offshore Islands, their ultimate objective being to secure the collapse of the Nationalist regime.

By August 23 the Chinese Nationalists had become convinced that a move against the Offshore Islands was in the making. For the Nationalists this could only be viewed as an opportunity to involve the United States in a major military action against the Chinese Communists, which was clearly their only hope for a return to the mainland. The Nationalists' maneuver to secure a U. S. backing for defense of Quemoy can be seen, as it probably was, as part of the effort to involve the United States in what was expected to be the oncoming military move against Quemoy or Matsu, or perhaps one of the smaller Offshore Islands. The Chinese Nationalists were probably not interested in deterring a Chinese Communist move by a U. S. declaration, but rather enhancing the probability of U. S. involvement by securing a public U. S. commitment prior to the outbreak of crisis. Though the Nationalists acted with restraint and caution prior to and throughout the crisis, they continued to drop hints that their patience might run out, that unless strong U. S. action were taken they might be forced to take unilateral action, and that they had every right to do so under the existing U. S.-Chinese Nationalist agreements.

Most American military and civilian officers in the Pacific area and in Washington were convinced that a crisis was about to break in the Taiwan Straits. They had been striving to get both a U. S. public statement which might head off a crisis and a firm U. S. decision on whether the Offshore Islands would in fact be defended. The general assumption was that the Islands would come under attack by an all-out air and sea interdiction campaign and that the United States would defend them with atomic attacks against the mainland. All of the policymaking echelons of the Government concerned seemed to be united in agreeing that Quemoy had to be defended. They were anxious not only to get a decision from Eisenhower and Dulles but also to make it clear to them that a firm decision had to include a willingness to use atomic weapons. Dulles had

reasons as
Chinats?

made clear on August 22 that he would support a defense of the Offshore Islands and had arranged for the letter to Representative Morgan implying a U. S. commitment to defend Quemoy. Washington was now convinced that a crisis was imminent but still reacted with some surprise when the military phase began on the next day.
